📖 Overview 📚 **Repositories** 19 📋 Projects 📦 Packages

Find a repository...   Type: All ▾   Language: All ▾   🖥 New

In the new page, click on the top-right button **New**.

Create a repository

In the new page, enter the **name** of the repository

Be sure it is set on **Public**

Check the box **Add a README file**

Click on the button **Create a repository**

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? Import a repository.

Owner *   **Repository name** *

marilenadaquino ▾   /   mynewreponame ✓

Great repository names are shor___iration? How about **refactored-octo-palm-tree**?

mynewreponame is available.

Description (optional)

⦿ 📖 **Public**
Anyone on the internet can see this repository. You choose who can commit.

○ 🔒 **Private**
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☑ **Add a README file**
This is where you can write a long description for your project. Learn more.

☐ **Add .gitignore**
Choose which files not to track from a list of templates. Learn more.

☐ **Choose a license**
A license tells others what they can and can't do with your code. Learn more.

This will set 🎋 main as the default branch. Change the default name in your settings.

Create repository

What to upload?

1. Your data **artchives.nq** (mandatory)
2. External data sources that you integrated (optional)
3. The final **csv/json file**(s) derived from your analysis
4. The jupyter notebook **.ipynb file**
5. The webpage **index.html** (mandatory)
6. Css / js files (optional)

How to upload?
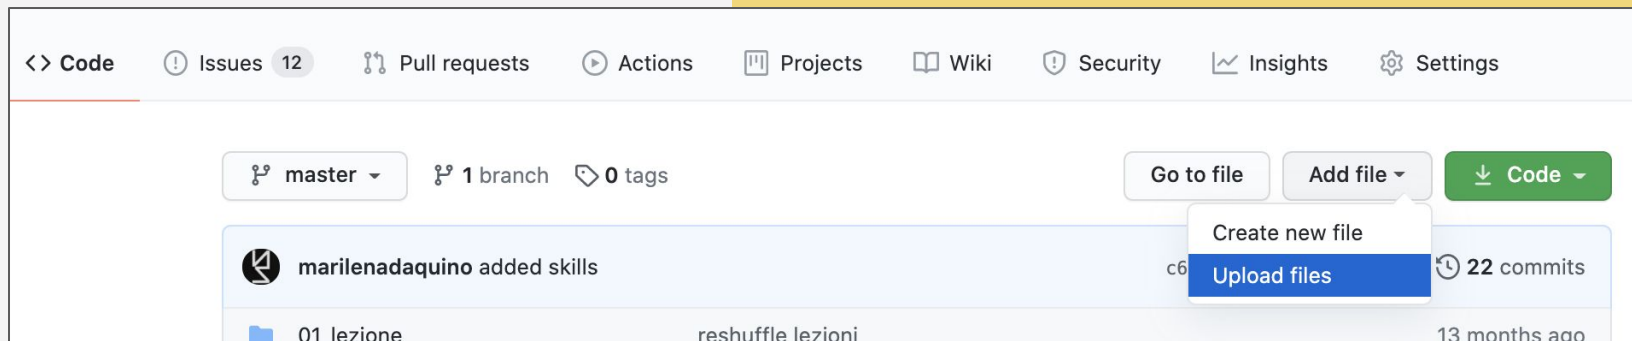

From the webpage of your repository, click on **Add file > Upload files**

How to upload?

informatica-umanistica /

Drag files here to add them to your repository

Or choose your files

Commit changes

Add files via upload

Add an optional extended description…

○ ⊸ Commit directly to the `master` branch.

○ ⑂ Create a **new branch** for this commit and start a pull request. Learn more about pull requests.

Commit changes   Cancel

Drag and drop your files here.

Add a short title to your commit with the important updates you did (e.g. added html file, min fix jupyter notebook)

Drawback: *if you use this method, you are not allowed to modify folders (rename, delete) after the first time you add them. You can only modify (rename, update, delete) files.*

Publish and document

Publish your website

https://pages.github.com/
Select project site!

Connect the jupyter notebook to binder

Copy & paste the url of your notebook here
https://mybinder.org/
Copy the markdown badge.

README

Create a README file in pycharm, include title, names, roles, license and paste the binder badge.

Publish your website

From your repo, click on **Settings**
Scroll down to the section called **Github Pages**

marilenadaquino / **epds**

Select a theme to publish your site with a Jekyll theme using the gh-pages branch. Learn more.

Choose a theme

GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

Your site is ready to be published at https://marilenadaquino.github.io/epds/.

Source
Your GitHub Pages site is currently being built from the main branch. Learn more.

Branch: main ▾   / (root) ▾   Save

Theme Chooser
Select a theme to publish your site with a Jekyll theme. Learn more.

Choose a theme

Custom domain
Custom domains allow you to serve your site from a domain other than marilenadaquino.github.io. Learn more.

[   ]   Save

☑ **Enforce HTTPS**
— Required for your site because you are using the default domain (marilenadaquino.github.io)

HTTPS provides a layer of encryption that prevents others from snooping on or tampering with traffic to your site.

Link your jupyter notebook to Binder

Go to https://mybinder.org

Enter the URL of your repository **+ /**.

Enter **main** in the field Git ref

Click on the button **launch**

It will take a while, you can monitor the loading bar on the bottom.

Build and launch a repository

GitHub repository name or URL

| GitHub ▾ | https://github.com/marilenadaquino/epds/ |

Git ref (branch, tag, or commit)

`main`

Path to a notebook file (optional)

| Path to a notebook file (optional) | File ▾ |

launch

Copy the URL below and share your Binder with others:

`https://mybinder.org/v2/gh/marilenadaquino/epds/main`

Copy the text below, then paste into your README to show a binder badge: 🚀 launch binder ▶

Waiting | **Building**
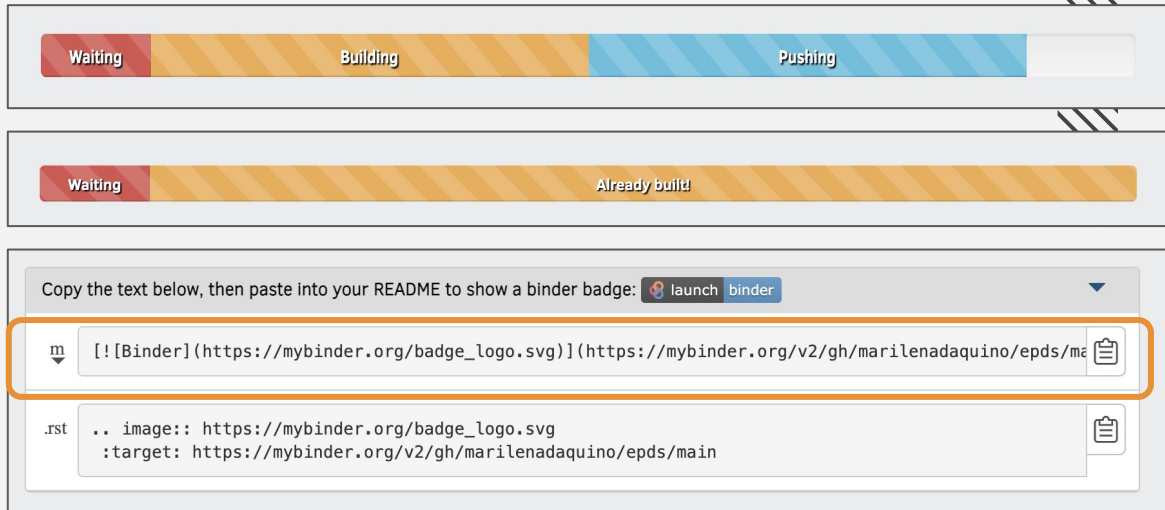

Build logs   hide

```
Waiting for build to start...
Picked Git content provider.
Cloning into '/tmp/repo2docker01hicudy'...
HEAD is now at 1b772d8 lesson 7-8
```

Link your jupyter notebook to Binder

Wait..

Meanwhile, expand the dropdown and **copy the markdown code of your Binder badge** (to be included in your repository README file later)

Waiting	Building	Pushing

Waiting	Already built!

Copy the text below, then paste into your README to show a binder badge: 🌀 launch | binder ▼

m
[![Binder](https://mybinder.org/badge_logo.svg)](https://mybinder.org/v2/gh/marilenadaquino/epds/ma

.rst
```
.. image:: https://mybinder.org/badge_logo.svg
   :target: https://mybinder.org/v2/gh/marilenadaquino/epds/main
```

Link your jupyter notebook to Binder

When it finishes to build your jupyter notebook, you'll be redirected to a "familiar" webpage.
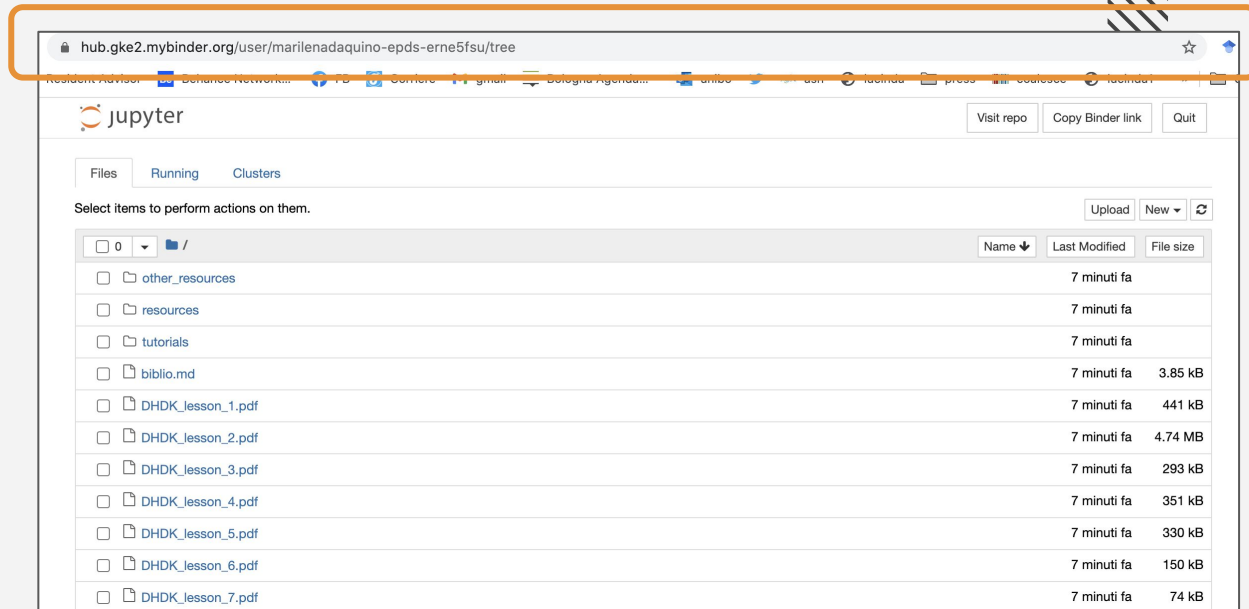

README file

From the main page of the repository, you have the default README file created while initialising the repository (it will include just the title and the description if you added it).

You can modify it by clicking on the **top right pencil**.

It opens a new page with the editor where you can **modify the text in Markdown**.

ASSESSMENT

STORYTELLING AND WEB COMMUNICATION SKILLS

A guide to self-assessment

Understanding of graphs/charts purpose	Usage of correct charts to represent data at hand
Selection of graphs/charts	Given the data at hand, usage of the most effective chart
Appropriateness of contents	Right amount of background/context/data/methodology (and in scope)
Strategic use of communication aspects	Titles, labels, explanations, visual clutter, color, white space
Overall design	No misspellings, no errors in data analysis. Correct order of contents. Clear message/action. Optimization of explanatory graphs / texts (summarisation)
Reliability of results*	*The conclusions make sense in the reality.*

* Make the possible bias in results explicit

QUESTIONNAIRES

Average grades

	Grades: 1 to 10	
7.8	ginevra.ravazzini@studio.unibo.it	Improve your graph interpretation skills (Q2)
9.57142	giulia.manganelli3@studio.unibo.it	Refine your SPARQL competencies (Q4)
9.29411	sara.coppini@studio.unibo.it	Refine your SPARQL competencies (Q4)
9.41176	giulia.renda2@studio.unibo.it	Some imprecisions in Q1
6.625	deniz.tural@studio.unibo.it	Improve your graph interpretation skills and SPARQL competencies (Q2,Q4)
9.4	alessia.cioffi@studio.unibo.it	Some imprecisions in Q1
9.7	lucilla.97@hotmail.it	Some imprecisions in Q2 (graph interpretation skills)
8.6	ariele.santello@studio.unibo.it	Some imprecisions in Q2 (graph interpretation skills)
8.66666	francesca.genovese2@studio.uibo.it	Improve your SPARQL competencies (Q4)

TRIVIA RESULTS!

Get to know your audience

Look in social media pages / forums

Propose a survey/poll on/questionnaire

Read literature

What is your audience

Auctioneers	Art historians / critiques	Museum or exhibition curators
Scholars / students	Universities	Art passionates
Teachers	Funding agencies	random users

What do they care about

Access data from different institutions from a single place

Understand relations between sources and their territory

Find non-mainstream art topics

Understand on which collections worths to invest (economically)

Gather information on the curators of collections

Gather photographs of artworks

Visualize connections between data for entertainment

Quick answers to exploratory research questions on collections

Study relations between people/movements and historical context

What do they need to do?

Learn new trends in art history	Create relations between artistic periods	Enrich existing data
Cite and reproduce studies	Gather data to decide which collections to invest on for the preservation	Create exhibitions on interesting topics
Differentiate topics of study	Collaborate with institutions	Compare study results with others

What is the benefit of their actions?

Study different topics broaden their perspectives

Validate research results and become seminal

Collaboration enriches networks

Receiving fundings allow to better preserve collections

Learn new methodologies and technologies

Engage with stakeholders/visitors

What is the risk if they don't act?

Be in a comfort zone and do not make new discoveries

No fundings means no preservation of history

Do not get inspiration from other works

Partial knowledge of the domain results in partial results

One-sentence idea

Create a network of people and institutions passionate about art and art historiography out of the mainstream trends of the big players art and cultural cities.

Art matters. Founding agencies must know its value in order to provide art collections with adequate resources for their preservation nevertheless in order to save and promote their knowledge to future audience.
For art to be known in future, we need to show its value now.

The study would be beneficial for art history researchers because it shares the raw data, the methodology and the results in a way that is possible for other researchers to repeat the process, learn something and validate research.

Which graph?
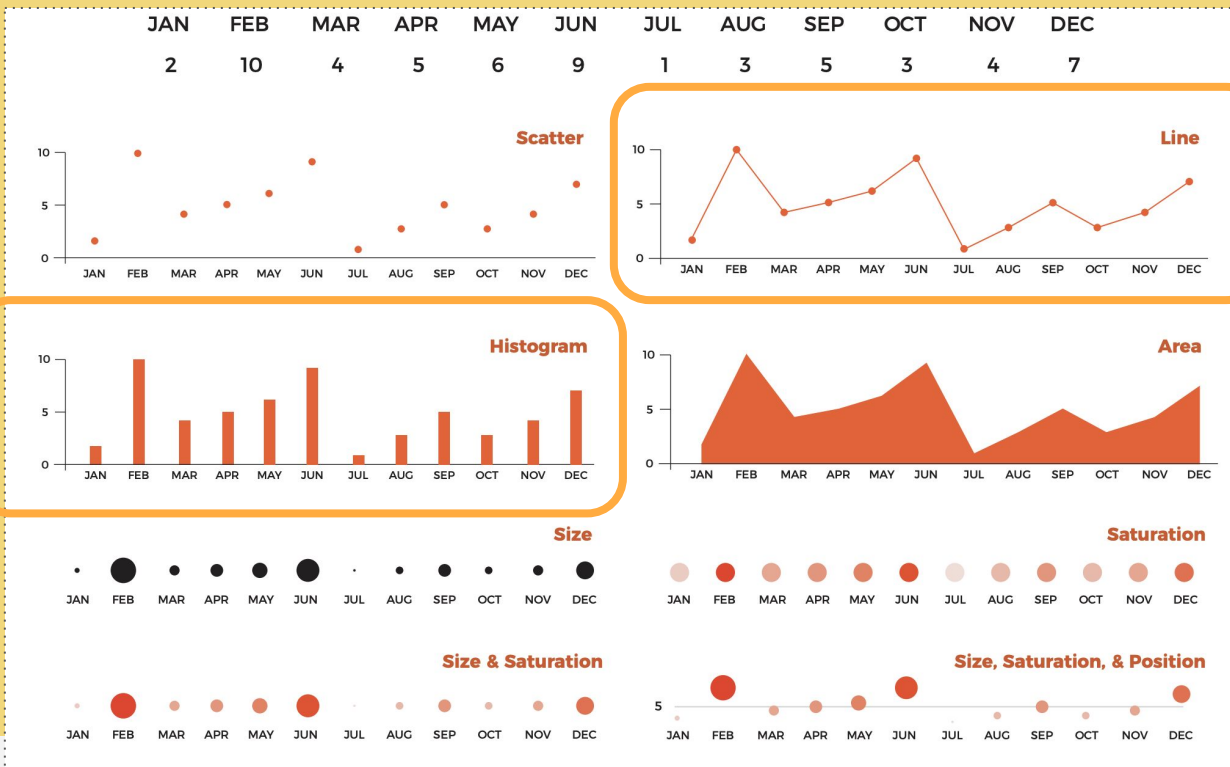

Assuming the most important information is WHEN we travel, and HOW MUCH we travel in some period...

How many graphs?

	2014	2015	2016	2017

Which title?

% of children aged 5–17 in work

−18% DECREASE

27.5 | 25 | 22 | 20 | 14.5 | 13 | 16 | 14 | 13.5 | 10.5 | 9.5

1950 1960 1970 1980 1990 1995 2000 2004 2008 2012 2016

different data sources used
good news: child work is decreasing again

Child labor has more than halved since 1950. "Only" 9.5% children are now at work.

Child labour's decrease: a new millenium trend.

Which description?

% of children aged 5–17 in work

−18% DECREASE

27.5 25 22 20 14.5 13 16 14 13.5 10.5 9.5

1950 1960 1970 1980 1990 1995 2000 2004 2008 2012 2016

different data sources used
the graph shows the percentage of children aged 5–17 that are working over time

The graph is showing the percentages of children aged 5–17 that are at work in the span of time between 1950 and 2016. The graph shows a decreasing tendency (with the only exception of the beginning of 2000s) that has brought to the encouraging result of only the 9.5% of children at work in 2016, with a decreasing value of 18% since 1950.

Percentage of kids aged between 5 and 17 that were in work in the years represented. The data show that the number of kids in work decreased by 18% from 1960

Which audience?

The % of Global Population Covered by Essential Health Services is Growing
